

2012 MICHIGAN GREEN CHEMISTRY AND ENGINEERING CONFERENCE

Driving Sustainable Manufacturing

Together with the Michigan Green Chemistry Roundtable, the Michigan Department of Environmental Quality is pleased to present the 2012 Michigan Green Chemistry and Engineering Conference, taking place on October 26th, 2012 at Wayne State University in Detroit, Michigan.

Green chemistry and engineering can revolutionize the way we work and live, by employing less toxic materials and processes in the manufacture and design of the products we use every day. While protecting human health and the environment, green chemistry and engineering can also help businesses create new markets, reduce costs, and gain a competitive edge.

As a key supporter and champion for promoting green chemistry and engineering in Michigan, you are essential to the success of these events. We are striving to keep costs low while providing valuable information to a diverse audience. Your assistance will help us do this and create a memorable day for all attendees, including several students. Please consider sponsoring the conference and Awards ceremony this year. By doing so, you will share the floor with other leaders and key stakeholders who are committed to moving green chemistry forward in Michigan.

SPONSOR LEVELS AND BENEFITS

\$3,500 Emerald
